

UPTIME WITH PADDOCK PROVEN TECHNOLOGY

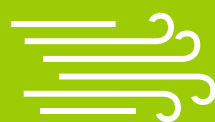

With 150 headers in the paddock over 2019 harvest and a combined total of 170 harvests, the Seed Terminator Mechanical Drive is paddock proven.

Advanced monitoring system:
Vibration (wear) +Blockage +Bearing condition

GRAIN CAPTURE OR WEED KILL? BOTH.

We work to create harmony between the Header & Seed Terminator so you don't have to decide between capturing grain & killing weeds as you harvest.

Cleaning Shoe Performance is Unaffected.

Seed Terminator causes no restrictions of airflow within the harvester cleaning shoe = confidence in the accuracy of grain loss checks = confidence in your harvester setup to minimise grain loss.

NEW

150HRS

AERODYNAMIC TUNGSTEN COATED MILL TECHNOLOGY

for even wear, reduced no load power and long lasting performance.
