

ZÜRN D62-SF

Self-propelled plot seeder for more.

Model	ZÜRN D62-SF
Working width	1.25 / 1.50 m
Weight incl. front ballast	approx. 1,750 kg
Engine power	27.7 kW (37.1 hp)

Intelligent combination

Self-propelled seeder based on a manoeuvrable John Deere tractor.

Economic alternative

The ZÜRN D62-SF is a powerful yet inexpensive alternative to the typical self-propelled machines. With little changeover time, the tractor can be used flexibly for other tasks throughout the year.

Simple transport

This rugged sowing combination convinces with a low weight. Simple transport on a 3.5 t car trailer allows quick and convenient transfer to the trial fields.

Serial-production technology

The ZÜRN D62-SF combines the advantages of a self-propelled machine with the flexibility of a tractor-
implement combination. Using proven technology from
serial production reduces asset and maintenance costs.

Intelligent drive

Since the seeder is mounted to the tractor in a fixed
mounting frame, there are no further wheels required.
A belt from the tractor rear axle engages the seeder
drive when lowering the coulter bar.

Manoeuvrable

The ZÜRN D62-SF is a compact unit with both operators
sitting close to another. Hydrostatic four-wheel
drive and large tyres ensure perfect traction and a
narrow turning circle.

Comfortable workplace

Tractor and seeder offer a comfortable operator's plat-
form. For convenient seed handling and occupational
safety, only the coulters are lifted, while the platform
including all operational elements remains stationary.

Modular layout

With its modular layout, the tractor basis can also be
combined with the single-row seeder ZÜRN D90 or
plot fertiliser spreader ZÜRN D50 and ZÜRN D51
respectively.

Off-the-shelf guidance system

The extremely manoeuvrable John Deere 3038E utility
tractor with special trial modifications can be equipped
with standard GPS guidance systems easily.
